Unemployment Rate*	5.20%	0.2%

Median Base Pay in New York City

Methodology:

Leveraging millions of anonymous salary reports shared on Glassdoor, the Glassdoor Local Pay Reports apply a proprietary machine-learning algorithm to estimate median annual base pay for full-time workers. October 2016 figures are current as of October 25, 2016. Metro areas are based on U.S. Census Bureau "core based statistical areas" (CBSAs). Overall trend line for metro-level median salary is based on a 3-month moving average. Median base pay is presented in nominal dollars, and is not adjusted for inflation or seasonally adjusted. **For more information about the accuracy of Glassdoor Local Pay Reports, visit: <https://www.glassdoor.com/research/glassdoor-local-pay-reports-oct-2016>.**
